Advertised Term Deposit rates are current at the time of publication but can be changed at any time. The current rate applies to all new Fixed Term Deposits and to Term Deposit rollovers at maturity.

Interest rates on Fixed Term Deposit are fixed for the term of the investment provided no funds are withdrawn prior to maturity. The interest rate paid on principal amounts withdrawn early will be adjusted by the percentage of the current term over the agreed term (e.g. if the term deposit is held for 80% of the original term, then 80% of the accrued interest on the amount withdrawn will be paid). Any funds not withdrawn will remain in the account until expiry of the agreed term and will attract the full rate of interest as originally specified. The minimum investment amount must be retained.
